The Vaspia

An extremely aggressive creature. Female Vaspia is 6 times larger than male. One drop of its poisonous venom could potentially kill a T-rex. It is not able to procreate to sustain the necessary number of members for thriving population, and that is the only good news for this creature.

Floud Dragon

Massive creature. area of its activity is deemed to be a taboo for ships passes by.

Lashie

This deadly insect could camouflage itself like leaves. It is a social insect. Those hooks could easily tear flesh. Hundreds of Lashies could kill massive creatures.

Dragons are among
the most popular
and enduring of
the world's
mythological creatures.

Dragon tales are found
in many cultures, the
earliest attested dragons
resemble giant snakes.

Dragon-like creatures are first
described in
the mythologies of the
ancient Near East and appear in
ancient Mesopotamian art and literature.
